BluSync by Parablu Offers Secure Enterprise File Collaboration and Synchronization Solution That Uses Azure Blob Storage to Enable Secure Sharing

PARABLU

MICROSOFT AZURE APP BUILDER PROFILE: Parablu, Inc.

At Parablu, our mission is to make businesses feel just as secure about their data in the cloud as they do with their data on-premises. By ensuring privacy, confidentiality, and security of digital assets, we enable enterprises to adopt the cloud with greater confidence.

WHAT WE OFFER

Sync, Share, and Collaborate

Parablu's BluSync is a secure enterprise file synchronization and sharing solution that uses Microsoft Azure Blob storage. It enables enterprise users to securely collaborate on any device.

Cloud Data Protection

BluSync is integrated with BluKrypt, ParaBlu's cloud access security broker, a security policy enforcement point that enables enterprises to fully manage their security policy enforcement in the cloud.

Data Management Features

BluSync comes with rich features for IT admins that enable them to stay in total control of users and data at all times. Enjoy mini-clouds for different teams, comprehensive endpoint support, and more.

Scalable Architecture

BluSync has been architected from the ground up for scalability and storage cost optimization, and is suitable for medium to large enterprises with globally distributed teams of any size.

WHY PARABLU?

"Parablu fills a critical need in today's cloud adoption landscape. Without ParaBlu, our customers would not have been able to leverage even a fraction of their public cloud storage as effectively as they've been able to." – Anand Prahlad, President and CEO, Parablu Inc.

Microsoft | Go-To-Market Services

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
