**MICROSOFT AZURE ISV PROFILE:**

Parablu specializes in security and data management solutions that make businesses feel just as secure about their data in the cloud as they do with their data on-premises. By ensuring privacy, confidentiality and security of digital assets, Parablu enables enterprises to adopt cloud computing with greater confidence.

# Company's Data Loss Threat Foiled by OneDrive for Business-Enabled Secure Backup Solution

**“Microsoft One Drive for Business is the cloud of choice for our enterprise customers. Our secure endpoint backup and recovery solution enables our customers to capitalize on the power of public cloud to achieve secure, reliable, and scalable endpoint backup.” – Anand Prahlad, CEO, Parablu**

- **SITUATION**

A global IT services company faced a challenge – how to achieve reliable and secure backups of their employee desktop and laptop computers spread across different geographies. They had allowed employees to be responsible for their own backups and many were either not backing up at all, or were using external USB drives. The possibilities for data loss and leakage were high. The company needed a centralized solution that wouldn't slow people down.

- **SOLUTION**

Parablu's BluVault, a cloud access security broker-enabled endpoint backup and restore solution, met all the company's requirements in terms of privacy, security, reliability and scalability for a centralized backup solution. BluVault works seamlessly with Microsoft OneDrive for Business cloud storage, which is great for the company. Files and data are backed up without sacrificing security and without disrupting normal workflow, allowing geographically dispersed employees to stay productive working within the familiar Microsoft Office 365 and OneDrive for Business user interfaces.

- **BENEFITS**

Backing up files and data to OneDrive for Business offers the enterprise assurance that their digital assets are accessible, yet secure.

Leveraging OneDrive for Business reduces costs while enabling enterprises to embrace the cloud with confidence.
